Enjoy the Water and Stay Healthy

The week before Memorial Day (May 23–29, 2011) is Recreational Water Illness and Injury (RWII) Prevention Week. The goal of this observance is to raise awareness about healthy and safe swimming behaviors, including ways to prevent recreational water illnesses (RWIs) and injuries. RWIs are caused by germs spread by swallowing, breathing in mists or aerosols of, or having contact with contaminated water in swimming pools, hot tubs, water parks, water play areas, interactive fountains, lakes, rivers, or oceans. RWIs can also be caused by chemicals in the water or chemicals that evaporate from the water and cause indoor air quality problems.

RWI Prevention Week 2011 Theme: Prevent Swimmer’s Ear

Swimmer's ear (also known as otitis externa) is an infection of the outer ear canal that can cause pain and discomfort for swimmers of all ages. Swimmer’s ear affects millions of Americans every year and results in hundreds of millions of dollars in hospitalization costs. The good news is that swimmer’s ear is preventable. This year, to help ensure a healthy and pain-free swimming experience, the Centers for Disease Control and Prevention (CDC) is encouraging swimmers to follow the Swimmer’s Ear Prevention Guidelines below.

Swimmer’s Ear Prevention Guidelines

**DO** keep your ears as dry as possible.

- Use a bathing cap, ear plugs, or custom-fitted swim molds when swimming.

**DO** dry your ears thoroughly after swimming or showering.

- Use a towel to dry your ears well.
- Tilt your head to hold each ear facing down to allow water to escape the ear canal.
- Pull your earlobe in different directions while the ear is faced down to help water drain out.

**DON’T** put objects in the ear canal (including cotton-tip swabs, pencils, paperclips, or fingers).

**DON’T** try to remove ear wax. Ear wax helps protect your ear canal from infection.

JANICE RUTHERFORD.....Second District  
JOSIE GONZALES, CHAIR.....Fifth District  
NEIL DERRY.....Third District  
GARY C. OVITT.....Fourth District

- If you think that the ear canal is blocked by ear wax, consult your healthcare provider.

**CONSULT** your healthcare provider about using ear drops after swimming.

- **Drops should not be used** by people with ear tubes, damaged ear drums, outer ear infections, or ear drainage (pus or liquid coming from the ear).

**CONSULT** your healthcare provider if you have ear pain, discomfort, or drainage from your ears.

For more information on RWI prevention, visit [www.cdc.gov/healthywater/swimming/rwi/rwi-prevent.html](http://www.cdc.gov/healthywater/swimming/rwi/rwi-prevent.html). For more information on drowning prevention, visit [www.cdc.gov/SafeChild/Drowning/index.html](http://www.cdc.gov/SafeChild/Drowning/index.html). For more information about healthy swimming, visit CDC's Healthy Swimming website at [www.cdc.gov/healthyswimming](http://www.cdc.gov/healthyswimming).

For general information regarding RWI and injuries, contact the San Bernardino County Department of Public Health, Environmental Health Services, at 909-884-4056.
